Microsoft Dataverse Web API

- One of the two ways to connect to Dataverse

- Based on OData 4.0

- CRUD(E)

- Can be used inside AND outside the instance

nordic summit

Dataverse REST Builder

- Free and Open Source (MIT License)

- Managed Solution, XrmToolBox, Dataverse DevTools

- Online Demo

- Supports different syntaxes

nordic summit

Why Dataverse REST Builder?

- Inspired by CRM REST Builder (from Jason Lattimer)

- New column types and messages

- Dataverse Web API is "a wonderful experience"

- I had free time

nordic summit

C#, or not C#, that is the question

- You are not forced to use Dataverse Web API

- Official NuGet packages for C# (old "CRM SDK")

- You can use Early Bound with C#

- Don't reinvent the wheel

nordic summit

11 November 2022

OData 2.0 removal

- It will stop to work 11 November 2022

- You need to rewrite your scripts (to Xrm.WebApi or OData 4.0 calls)

- SOAP is not affected (for now)

- Dataverse REST Builder can assist you with the rewriting
