# What is a Managed Environment?

A set of premium tools to improve the management of Power Platform Environments

Improved Sharing of Apps

Greater insight of usage

Solution Pipelines

Customer Lockbox

Desktop flow Actions in DLP

[aka.ms/ManagedEnvForPower](https://aka.ms/ManagedEnvForPower)

# Hang on, there is more

Preview features will be Managed Environment Exclusives when released

Maker Welcome screen [Microsoft Learn](#)

Solution checker enforcement [Microsoft Learn](#)

IP Firewalls [Microsoft Learn](#)

Component Catalog [Microsoft Learn](#)

Environment routing [Microsoft Learn](#)

# Hang on, there is even more

Preview features will be Managed Environment Exclusives when released

Customer Managed Key [Microsoft Learn](#)

Extended Back up (7 → 28 days) [Microsoft Learn](#)

Export Data to App Insights [Microsoft Learn](#)

# But CoE does this?

Feature	CoE Starter Kit	Huh?
Limit Sharing	Not real time	CoE provides alerts to warn admins over limits being exceeded
Usage Insights	Yes, better?	CoE uses PowerBI, and combines data
Pipelines	Sort of	Not OOTB CoE but ALM accelerator does and more options
Lockbox	Nope	
Desktop DLP	Nope	
Maker Welcome	Sort of	Welcome email
Solution Checker	Nope	
IP Firewalls	Nope	
Component Catalog	Sort of	Template and app components
Environment Routing	Nope	
Customer Managed Key	Nope	
Extend Backup	Nope	
Data export to App Insights	Nope	

# So, is it worth it?

## Citizen Developer

- Yes
- Controls and improves management and enables more people

## Developers

- Yes
- Adds ALM that is good enough for most
- Improves control for moving

## Developers ++

- No
- Adds complexity that you will ignore

## Admins

- Yes
- Gives you visibility and control
- Adds security
